

Q1. Create a Bank Account program where account number is final and cannot be

Code:

```
// Bank Account class
class BankAccount {
    final int accountNumber;
    String accountHolder;
    double balance;

    BankAccount(int accountNumber, String accountHolder, double balance) {
        this.accountNumber = accountNumber;
        this.accountHolder = accountHolder;
        this.balance = balance;
    }

    void displayDetails() {
        System.out.println("Account Number: " + accountNumber);
        System.out.println("Account Holder: " + accountHolder);
        System.out.println("Balance: " + balance);
    }
}

// Main class
public class Main {
    public static void main(String[] args) {
        BankAccount account = new BankAccount(10101, "Rahul", 25000);

        account.displayDetails();
    }
}
```

Output:

```
Account Number: 10101
Account Holder: Rahul
Balance: 25000.0
```

Q2.Create a Library Book Management program where the book ISBN is declared as final and cannot be changed once assigned. Display the book's ISBN, title,author, and price

Code:

```
// Book class
class Book {
    final String isbn;
    String title;
    String author;
    double price;

    Book(String isbn, String title, String author, double price) {
        this.isbn = isbn;
        this.title = title;
        this.author = author;
        this.price = price;
    }

    void displayBookDetails() {
        System.out.println("ISBN: " + isbn);
        System.out.println("Title: " + title);
        System.out.println("Author: " + author);
        System.out.println("Price: " + price);
    }
}

// Main class
public class Main {
    public static void main(String[] args) {
        Book book = new Book(
            "978-0135166307",
            "Java Programming",
            "Herbert Schildt",
            650
        );

        book.displayBookDetails();
    }
}
```

```
}
```

Output:

```
ISBN: 978-0135166307
```

```
Title: Java Programming
```

```
Author: Herbert Schildt
```

```
Price: 650.0
```
