

ASSIGNMENT No: 17

1. Create a simple Student Registration Form GUI using Swing.

Code:

```
import javax.swing.*;
import java.awt.*;
```

```
public class StudentRegistration {
    public static void main(String[] args) {

        JFrame frame = new JFrame("Student Registration Form");
        frame.setSize(400, 350);
        frame.setLayout(new GridLayout(5, 2, 10, 10));

        JLabel idLabel = new JLabel("Student ID:");
        JTextField idField = new JTextField();

        JLabel nameLabel = new JLabel("Name:");
        JTextField nameField = new JTextField();

        JLabel courseLabel = new JLabel("Course:");
        JTextField courseField = new JTextField();

        JLabel ageLabel = new JLabel("Age:");
        JTextField ageField = new JTextField();

        JButton button = new JButton("Register");

        frame.add(idLabel);
        frame.add(idField);

        frame.add(nameLabel);
        frame.add(nameField);

        frame.add(courseLabel);
        frame.add(courseField);

        frame.add(ageLabel);
```

```
frame.add(ageField);

frame.add(button);

button.addActionListener(e -> {
    JOptionPane.showMessageDialog(frame,
        "Student Registered Successfully!\n" +
        "Student ID: " + idField.getText() + "\n" +
        "Name: " + nameField.getText() + "\n" +
        "Course: " + courseField.getText() + "\n" +
        "Age: " + ageField.getText());
});

frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
frame.setVisible(true);
}
```

Output:

Student Registration Form

Student ID: 25070122245

Name: Akshat Thakur

Course: CSE

Age: 19

Register

Message

i Student Registered Successfully!
Student ID: 25070122245
Name: Akshat Thakur
Course: CSE
Age: 19

OK

2. Create a simple Employee Registration Form using Java Swing GUI that takes employee details such as Employee ID, Name, Department, and Salary. Display the entered information in a dialog box

Code:

```
import javax.swing.*.*;
```

```
import java.awt.*;

public class EmployeeRegistration {
    public static void main(String[] args) {

        JFrame frame = new JFrame("Employee Registration Form");
        frame.setSize(400, 300);
        frame.setLayout(new GridLayout(5, 2, 10, 10));

        JLabel idLabel = new JLabel("Employee ID:");
        JTextField idField = new JTextField();

        JLabel nameLabel = new JLabel("Name:");
        JTextField nameField = new JTextField();

        JLabel deptLabel = new JLabel("Department:");
        JTextField deptField = new JTextField();

        JLabel salaryLabel = new JLabel("Salary:");
        JTextField salaryField = new JTextField();

        JButton button = new JButton("Submit");

        frame.add(idLabel);
        frame.add(idField);

        frame.add(nameLabel);
        frame.add(nameField);

        frame.add(deptLabel);
        frame.add(deptField);

        frame.add(salaryLabel);
        frame.add(salaryField);

        frame.add(button);

        button.addActionListener(e -> {
            JOptionPane.showMessageDialog(frame,
                "Employee Details\n" +
```

```
"Employee ID: " + idField.getText() + "\n" +  
"Name: " + nameField.getText() + "\n" +  
"Department: " + deptField.getText() + "\n" +  
"Salary: " + salaryField.getText());  
});  
  
frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);  
frame.setVisible(true);  
}  
}
```

Output:

The image shows two windows from a Java application. The top window is titled "Employee Registration Form" and contains four text input fields with labels: "Employee ID:" (127492), "Name:" (Somesh Tiwari), "Department:" (Data Science), and "Salary:" (98,00,000). Below the fields is a "Submit" button. The bottom window is a "Message" dialog box with an information icon, titled "Employee Details", displaying the entered values: "Employee ID: 127492", "Name: Somesh Tiwari", "Department: Data Science", and "Salary: 98,00,000". It has an "OK" button.

Field	Value
Employee ID	127492
Name	Somesh Tiwari
Department	Data Science
Salary	98,00,000
