

Assignment 16

1. Create a Voting System that throws a custom exception if age is below 18

Code:

```
class AgeException extends Exception {
    AgeException(String message) {
        super(message);
    }
}

public class VotingSystem {

    static void checkAge(int age) throws AgeException {
        if (age < 18) {
            throw new AgeException("You are not eligible for voting.");
        }

        System.out.println("You are eligible for voting.");
    }

    public static void main(String[] args) {
        int age = 16;

        try {
            checkAge(age);
        } catch (AgeException e) {
            System.out.println("Error: " + e.getMessage());
        }
    }
}
```

Output:

```
Error: You are not eligible for voting.
```

For age = 20

```
You are eligible for voting.
```

1. Create a Voting System that throws a custom exception if age is below 18

2. Create a Driving License System that throws a custom exception if the user's age is below 18. If the age is valid, display that the user is eligible for a driving license

Code:

```
class LicenseAgeException extends Exception {
    LicenseAgeException(String message) {
        super(message);
    }
}

public class DrivingLicense {

    static void checkEligibility(int age) throws LicenseAgeException {
        if (age < 18) {
            throw new LicenseAgeException(
                "Age must be 18 or above for a driving license."
            );
        }

        System.out.println("You are eligible for a driving license.");
    }

    public static void main(String[] args) {
        int age = 17;

        try {
            checkEligibility(age);
        } catch (LicenseAgeException e) {
            System.out.println("Error: " + e.getMessage());
        }
    }
}
```

Output:

```
Error: Age must be 18 or above for a driving license.
```

For age = 21

```
You are eligible for a driving license.
```
